see attached search history	8/25/09	JC
consulted with examiner Winakur, result: examiner Winakur thinks with added limitations of the directional indicators connected to the marker wire overcomes the prior art of Makower and it is not obvious to move the positions of the directional indicators of Makower to touch the circle	2/23/10	JC
consulted with examiner Le, result: examiner le thinks it is obvious to change the shapes of the direcional indicators as well as their location so that they physically connect to form a symbol, therefore Makower still stands	2/24/10	JC
consulted with examiner Barrett, result: examiner Barrett thinks that it is obvious to change Makower to the same design as the invention, furthermore he does not think that "to connect" has to physically touch to be connected.	2/25/10	JC
